

Faith, truth & craftsmanship

OPTIONAL CHRISTIAN VOCATION COMPANION • NONCREDIT

MRR-RV105 | RV Systems, Safety & Pre-Delivery Inspection Foundations

STATUS: Proposed instructional materials. Not state-approved, accredited, RVTI-authorized, or college-credit-bearing.

Purpose and audience

For learners who voluntarily choose a Christian frame for vocational life. The structure emphasizes careful exposition of a biblical passage, honest self-examination, disciplined practice, responsible service and accountable workmanship. This companion is independent original material; it is not authored or endorsed by John MacArthur, Grace University, Grace Christian University, The Master's University, or any ministry. There is no MRR or college credit for religious agreement.

The method

- Read the passage in context rather than choosing a slogan.
- State what the text teaches, with attention to audience and immediate setting.
- Connect that principle to truthful service, stewardship, safety, or compassion without claiming Scripture is a substitute for codes or technical data.
- Examine a real decision: what would integrity require if profit or pride pulls another direction?
- Pray or reflect voluntarily; never use faith disclosure as a technical grading criterion.

Week 1: The technician's calling: ethics, safety and evidence

Passage for individual study: Proverbs 11:1 — truthful measurements and honest dealing.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 2: RV construction, identification and inspection logic

Passage for individual study: Luke 16:10 — care in small things.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 3: 12-volt DC principles and circuit protection

Passage for individual study: Colossians 3:23 — work wholeheartedly.

MICHIGAN RV REPAIR / MRR ACADEMIC DEVELOPMENT

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 4: Low-voltage troubleshooting and technical records

Passage for individual study: Proverbs 18:13 — listen before answering.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 5: 120-volt AC awareness, shore power and protective devices

Passage for individual study: Romans 12:10 — honor and care for others.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 6: Batteries, converters, inverters, solar and energy flow

Passage for individual study: Proverbs 27:23 — know the condition of what is entrusted to you.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 7: Fresh-water delivery, pumps and fixtures

Passage for individual study: 1 Peter 4:10 — serve others as stewards.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 8: Wastewater systems, sanitation and seasonal care

Passage for individual study: Proverbs 21:5 — diligent planning.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 9: LP-gas components and hazard recognition

Passage for individual study: Psalm 82:4 — protect the vulnerable.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 10: RV appliances, ventilation and HVAC overview

Passage for individual study: Ephesians 4:25 — speak truthfully.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 11: Generators and power-interface safety

Passage for individual study: Mark 10:45 — service over status.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 12: Roofing, seals, sidewalls and moisture evidence

Passage for individual study: Proverbs 12:22 — truthful reports.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 13: Chassis, tires, brakes and weight awareness

Passage for individual study: Philippians 2:4 — consider another's safety.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 14: Pre-delivery inspection, customer demonstration and QA

Passage for individual study: 1 Corinthians 14:40 — order and care.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

MICHIGAN RV REPAIR / MRR ACADEMIC DEVELOPMENT

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Week 15: Integrated examination and supervised practical capstone

Passage for individual study: 2 Timothy 2:15 — diligence and accurate handling of truth.

Personal reflection (optional): What does this passage teach about truthful responsibility, care for one's neighbor, humility, diligence or mercy? How could those convictions shape the way you write a report, accept correction, or protect a customer? Identify a concrete action and a possible conflict of interest.

Discussion boundary: Respect the text and the student. Technical assessment remains evidence-based and independent of religious belief.

Seminar conclusion

A craftsman of integrity does not make claims his evidence cannot bear. He serves the customer by limiting his work to what he can perform competently and by reporting what remains unresolved. That standard is intelligible and binding in the technical curriculum regardless of a learner's spiritual convictions.
